# ЛАБОРАТОРНАЯ РАБОТА №2

ДИСЦИПЛИНА: «Кроссплатформенная разработка ПО»

Выполнил: студент гр. ИУК4-62Б	(Подпись)	_ ( <u>Калашников А. С.</u> ) (Ф.И.О.)
Проверил:	(Подпись)	( <u>Пчелинцева Н. Н.</u> (Ф.И.О.)
Дата сдачи (защиты): Результаты сдачи (защиты):		
- Балльная - Оценка:	і оценка:	

**Цель**: Получить навык разработки приложения с использованием фреймворка Qt.

### Задачи:

- 1. Ознакомиться со средой разработки Qt Creator.
- 2. Получить навыки написания программ с использованием фреймворка Qt. Задание: В качестве предметной области использовать вариант из лабораторной работы №1. Разработать приложение с графическим интерфейсом на основе фреймворка Qt. Приложение должно реализовывать функционал из предыдущей работы. В приложение добавить возможность авторизации пользователей. Приложение должно работать на разных платформах (Linux, Windows).

#### Решение:

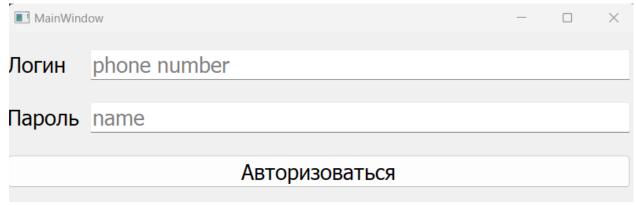

Рис. 1 Авторизация

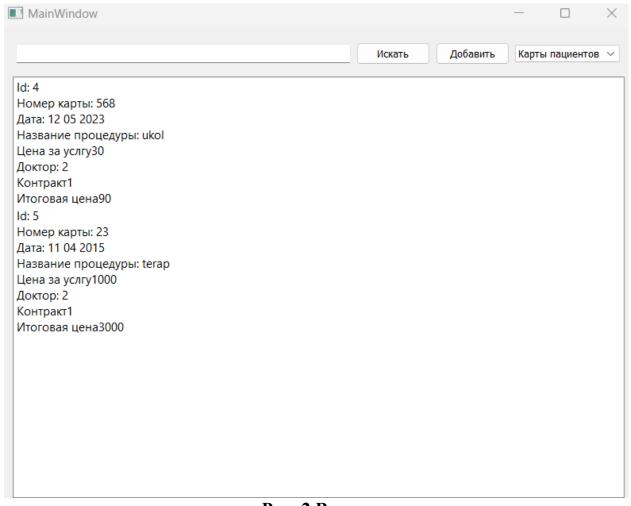

Рис. 2 Вывод

**Вывод:** в ходе выполнения лабораторной работы были получены практические навыки разработки приложения с использованием фреймворка Qt.
